Abstract Article template for the ReScience journal. The template requires a standard TeXLive installation in order to compile it and this PDF has been compiled using TeXLive 2017. Both the style, the layout and the colors of the template aim at giving ReScience a strong but subtle identity.

Equations

The well known Pythagorean theorem $x^2 + y^2 = z^2$ was proved to be invalid for other exponents. Meaning equation (1) has no integer solutions:

$$x^n + y^n = z^n \tag{1}$$

I have a proof but it doesn't fit in the margin…
